# WHAT IS FOREX TRADING ?

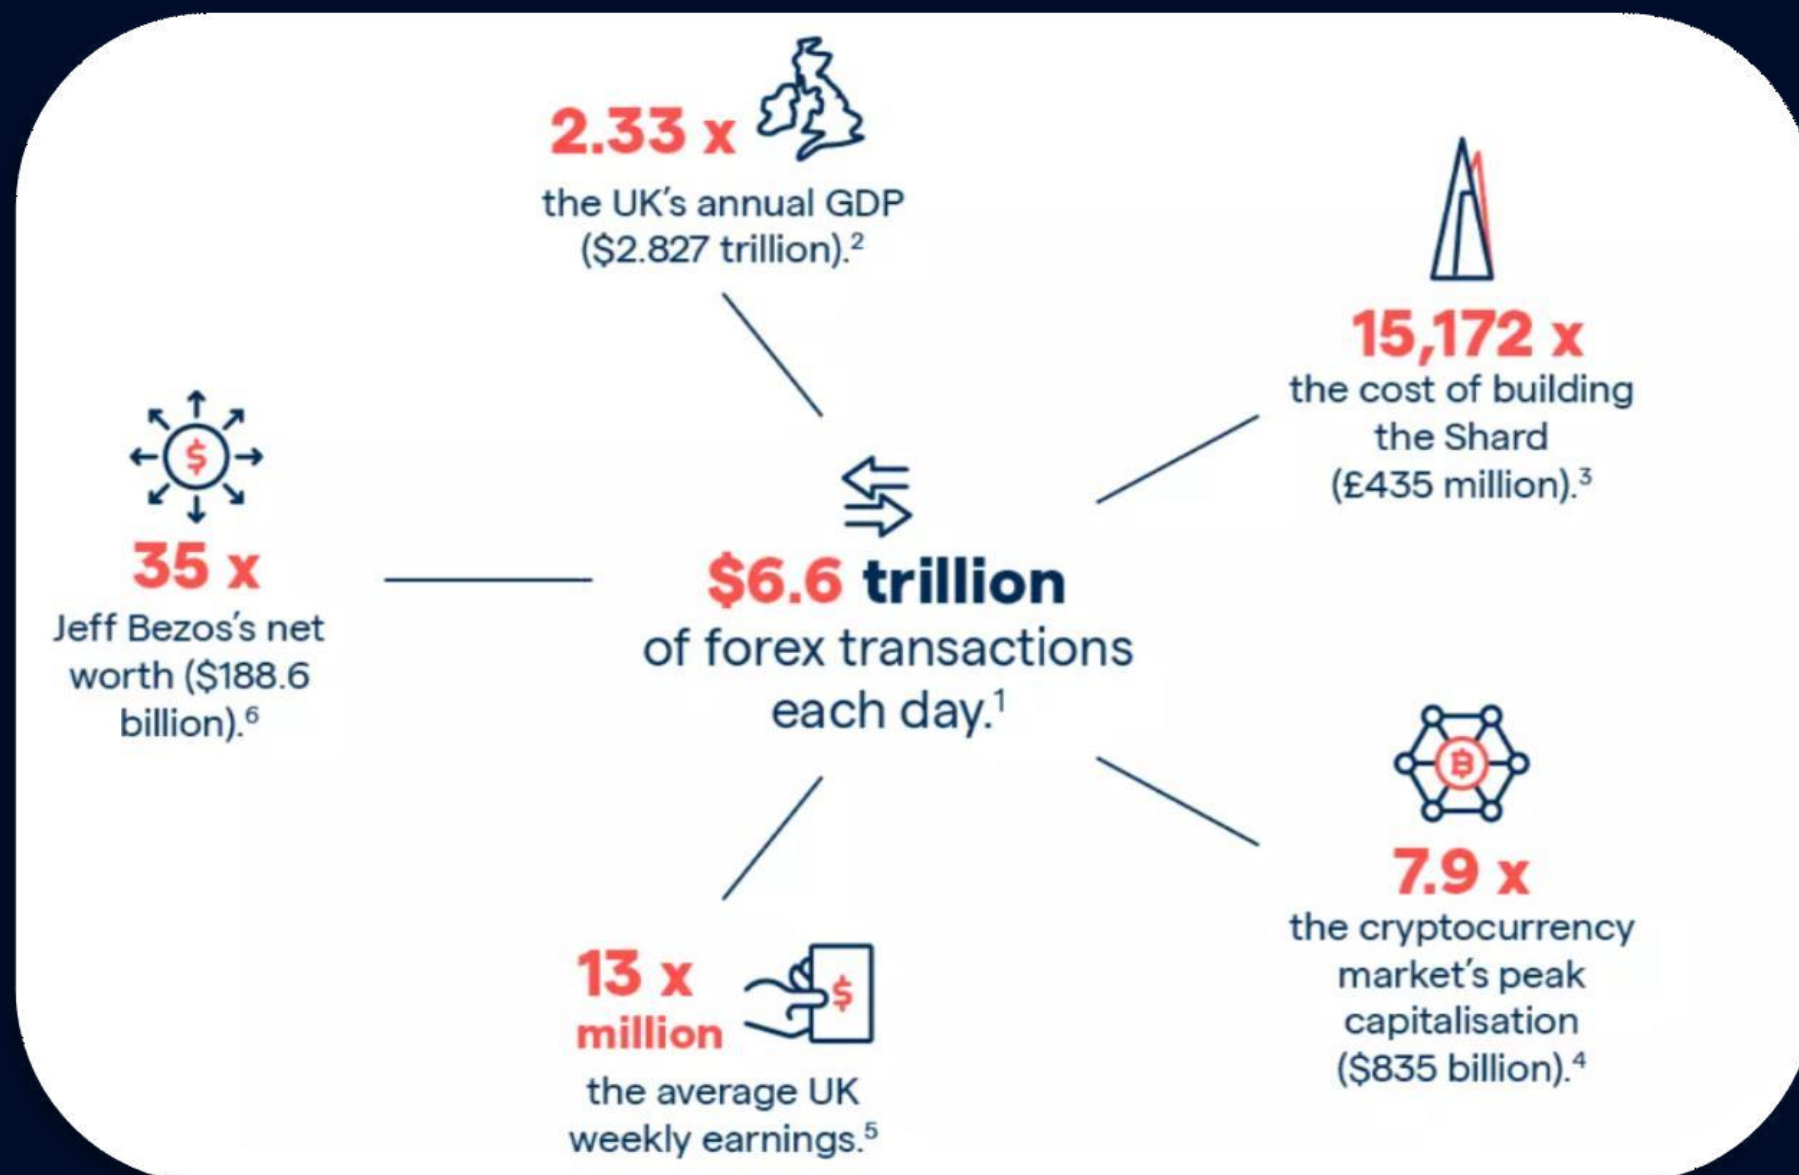

The Trading is simply referred to as buying and selling securities to make money on daily price changes. If you want to trade in the share market, you should have a good grasp of the fundamentals of share trading. Investing is very much essential these days as savings alone is not adequate to beat inflation and fulfill all our financial goals.

There are several investment opportunities available, and you can choose them as per your needs and convenience. It involves vigorous participation in the financial markets in comparison to investing, which primarily works on a buy-and-hold strategy. This article allows us to study in-depth about trading, types of trading, and how it works.
